

Vinicius Oliveira

Software Engineer

São Paulo, Brazil • eovinius10@gmail.com • linkedin.com/in/eovinius • github.com/eovinius • eovinius.dev

Summary

Software Engineer with 4 years of backend experience, specialized in .NET and in building distributed, scalable and resilient systems. Experienced in API and microservices architecture on AWS, applying sound engineering practices and observability. I use AI in development to increase productivity and efficiency without compromising delivery quality.

Technical Skills

Languages: C#, .NET, Go (Golang)

Cloud & DevOps: AWS (Lambda, EC2, S3, SQS, SNS, CloudWatch), Docker, CI/CD, Git, GitHub, Jenkins, Datadog, SonarQube

Databases: SQL Server, PostgreSQL, MongoDB, Redis

Architecture & Practices: Microservices, Serverless, Clean Architecture, Clean Code, Design Patterns, Event-Driven, TDD, DDD, CQRS, SOLID, BFF.

Methodologies: Scrum, Kanban

Experience

ITAÚ UNIBANCO

São Paulo, Brazil

Mid-level Software Engineer

May 2026 – Present

- Develop and evolve .NET backend services for investment products, working on architecture, service integration, and scalability and resilience requirements.
- Build APIs and distributed flows integrated into the investments ecosystem, focused on reliability, observability and code quality.

WEBMOTORS

São Paulo, Brazil

Mid-level Software Engineer

Feb 2026 – May 2026

- Developed backend APIs and services in .NET (C#), applying Clean Code and SOLID.
- Worked on microservices and serverless architecture, ensuring scalability and high availability.
- Implemented AWS solutions (Lambda, API Gateway) and infrastructure as code with CloudFormation.
- Observability with Datadog (logs, metrics and distributed tracing).
- Optimized data access with SQL Server and Dapper.
- CI/CD with Jenkins and automated tests.

INSPAND

São Paulo, Brazil

Mid-level Backend Developer

Aug 2025 – Feb 2026

- Developed and maintained REST APIs with .NET.
- Implemented integrations with AWS Lambda and process automation.
- Set up scheduled routines with CloudWatch.
- Maintained a relational database and improved the delivery flow.

CONTACTONE

São Paulo, Brazil

Junior Backend Developer

Mar 2024 – Aug 2025

- Migrated a legacy system to .NET 8 and Vue.js.
- Implemented asynchronous processing and refactored critical business rules.
- Wrote unit tests reaching 94% coverage.
- Adapted the system for new clients, reducing onboarding time.
- Standardized environments with Docker.

Education

FIAP

Postgraduate Degree in Software Architecture

Jan 2027 – Dec 2027 (Expected)

UniFECAF

Technologist Degree in Systems Analysis and Development

Aug 2024 – Dec 2026

SENAC

Technical Course in Systems Development

Apr 2022 – Oct 2023

Certifications

- AWS Certified Solutions Architect Associate
- AWS Certified Cloud Practitioner
